

## Topic Homework: What Makes The Earth Extreme?

This homework is an opportunity for you to research something that interests you and that you will enjoy taking time over. You can be as creative as you like and these ideas are suggestions. You might have one of your own you would like to try!

The Homework Festival will take place on the morning of Friday 14<sup>th</sup> January. Please bring your homework in the day before.

Create an advice leaflet outlining what to do should a volcano erupt. This could be a modern leaflet or for a Roman trying to survive in Pompei.

Make a 3D model of a volcano – it could even be based on an actual volcano, e.g. Etna or Vesuvius. It could be made of papier-mâché, cake, Lego, Modroc...

Design a board game inspired by volcanoes or extreme weather like tornadoes – what sort of challenge cards and facts could it contain?

Make a tornado in a jar – write a set of instructions for someone else to follow and explain what a tornado is. Are there any other weather features you could recreate?

These are just some of Miss Hnat's suggestions – is there something else you would like to try? A crossword puzzle? A PowerPoint slideshow? An adventure story? A design for the Ultimate Weather-Defying Umbrella?

I can't wait to see what you try!
