

What I have learnt already

1	Living or Alive	Which things are living, dead and things which have never been alive
2	Surviving	All animals need water, air, and food to survive.
3	Names	The names of some common plants and types of trees.

living

dead

never living

Facts I need to learn now

1	Habitat	A place where living things have all the things they need to survive. This includes food, water, air, space to move and grow and some shelter.
2	Where are habitats?	Some habitats are large, like the ocean, and some are very small, e.g., under a log.
3	Habitats in our local area	The habitats in our local area include woodlands, ponds, or rivers. Other habitats include the coast and the forest.
4	Microhabitat	A very small habitat where minibeasts may live e.g., under stones, in grass and in the soil.
5	Minibeasts	They can survive in their habitats because they can find what they need to survive, such as food and water.

What I will learn next

1	Survival	Identify that living things need the right amount of nutrition to survive.
2	Functions	Explore the needs of a plant for life and growth and how they change from plant to plant.

Vocabulary (Words I need to know)

1	Biomes	A natural area of vegetation and animals.
2	Carnivore	An animal that eats meat.
3	Habitat	The natural environment in which an animal or plant normally lives or grows.
4	Herbivore	An animal that only eats plants.
5	Invertebrate	A creature that does not have a spine, for example an insect, a worm, or an octopus
6	Microhabitat	A small part of the environment that supports a habitat, such as a fallen log in a forest.
7	Minibeast	A small invertebrate animal such as an insect or spider.
8	Omnivore	A person or animal that eats all kinds of food, including
9	Plant	A living thing that grows in the earth, has a stem, leaves, and roots.
10	Tree	A tall plant that has a hard trunk, branches, and leaves.
11	Vertebrate	A creature which has a spine.
